

CASAMANCE

The collections for autumn-winter 2022 are an invitation to reconnect with materials and discover many forms of luxury. They open with sculpted shapes, highlighting the beauty of gestures, showcasing pigments and organic materials, at the junction between art and craft. They continue with opulence and brilliance, the fluidity and richness of textures, encountering novelty, shine, and encourage us to adapt our interiors with this style.

Celebrating handmade crafts, the collections take us to the heart of an artist's workshop and the backstage of "haute couture". Then, on to Paris, City of Light, and home to important artistic movements, from Art Nouveau to Art Deco. They are inspired by the curved and asymmetric lines of private mansions, the elegant restraint of the theatres and the muted shades of the exhibitions.

Casamance celebrates this French lifestyle, where each moment is elegant and exceptional.
